

NEW TRENDS IN PROBABILITY AND STATISTICS

Volume 3

Multivariate Statistics and Matrices in Statistics

Proceedings of the 5th Tartu Conference,
Tartu – Pühajärve, Estonia, 23-28 May 1994

Editors

E.-M. Tiit, T. Kollo and H. Niemi

CONTENTS

Preface	ix
I. ASYMPTOTIC DISTRIBUTIONS AND EXPANSIONS	
Error Bounds for Asymptotic Expansions of the Distributions of the Classification Statistic W and Related Statistics <i>Y. Fujikoshi</i>	3
Some Results on the Empirical Spacings Process and Its Bootstrapped Version <i>S. Rao Jammalamadaka and Jing Qin</i>	17
On the Cornish–Fisher Expansion in Finite Population <i>I. Traat</i>	35
II. GENERAL LINEAR REGRESSION MODELS	
On Proportionality of Regression Coefficients in Misspecified General Linear Regression Models <i>U. Pötter</i>	45
More on Partitioned Possibly Restricted Linear Regression <i>H. J. Werner and C. Yapar</i>	57
Simpler Tests of Linear Inequality Constraints in the Standard Linear Model <i>R. W. Farebrother</i>	67
Increasing the Correlations with the Response Variable may not Increase the Coefficient of Determination: A PCA Interpretation <i>C. M. Cuadras</i>	75
Discussion on the Paper of C. M. Cuadras: “Increasing the Correlations with the Response Variable may not Increase the Coefficient of Determination: A PCA Interpretation” <i>E.-M. Tiit</i>	85
Testing Lack of Fit in Mixed Effect Models for Longitudinal Data <i>M. Palta and R. P. Qu</i>	93

III. TESTS IN MULTIVARIATE STATISTICS

- A Projection NT-type Test for Spherical Symmetry
of a Multivariate Distribution
Li-Xing Zhu, Kai-Tai Fang and Jin-Ting Zhang 109
- Some Applications of Directional Statistics to Astronomy
P. E. Jupp 123
- Simple Methods for Fitting Circles or Points to Spherical Data
R. W. Farebrother 135

IV. MULTIVARIATE NONPARAMETRIC MODELS AND THEIR APPLICATIONS

- The Use of Hellinger Distance in Graphical Displays
of Contingency Table Data
C. Radhakrishna Rao 143
- Bivariate Generalizations of the Median
A. Niinimaa 163
- Distance-Based Regression in some Heliophysical Data Analysis
A. Bartkowiak 181
- Some Applications of Multivariate Analysis in Environmental
Research
M. Greenacre and R. Fieler 197
- Methods for Longitudinal Social Network Data: Review
and Markov Process Models
T. A. B. Snijders 211
- Optimal Industrial Classification
J. S. Chipman and P. Winker 229

V. DISCRIMINATION AND CLASSIFICATION

- Small Sample Properties of Ridge-Estimate of the Covariance
Matrix in Statistical and Neural Net Classification
Š. Raudys and M. Skurikhina 237
- Trimmed k -Means and the Cauchy Mean-Value Property
J. A. Cuesta-Albertos, A. Gordaliza and C. Matrán 247
- On some Properties of k -Variance
K. Pärna and J. Lember 267
- Random Multigraphs, Classification and Clustering
B. Harris, E. Godehardt and A. Horsch 279

VI. MATRICES IN STATISTICS

Shorted Matrices and Their Applications in Linear Statistical Models: A Review <i>S. K. Mitra, S. Puntanen and G. P. H. Styan</i>	289
Arrays of Multivariate Statistics and Their Representation <i>E. Käärrik and E.-M. Tiit</i>	313
On the Calculations with the Indexed Sets of Data <i>O. Karma</i>	325
On Statistical Applications of Matrix Majorization <i>J. Hauke and A. Markiewicz</i>	335
